Smaller, More Convenient Package Size for Professional Technicians

Solstice® yf (R-1234yf) Service Can
Solstice® yf Service Cans

The Refrigerant You Need, When You Need It

Solstice® yf, also known as R-1234yf, is the new standard refrigerant being adopted by automakers around the world. Now you can service the A/C systems in those cars easier than ever with new smaller, more convenient Solstice yf service cans.

Easy as 1-2-3-4

1. Refer to the AC sticker under the hood to find the refrigerant and recommended charge size

2. Connect to the system using a Manifold Gauge Set specifically designed for R1234yf*

3. Use a R1234yf Can Tap with depressor to open the self sealing valve on the can*

4. Charge the R1234yf system using the same safe practices you use for R134a systems

Solstice yf Is The Trusted Choice

As more governments worldwide adopt environmental regulations calling for the phaseout of R-134a due to its high global-warming-potential (GWP), Solstice yf has become the refrigerant standard for air conditioning and will continue to lead well into the future.

Convenient Solstice yf 4-packs are available at thousands of auto aftermarket retailers nationwide.

REGULATORY UPDATE: Section 608 and 609 of the Clean Air Act as of 1/1/2018
